

Robust by Design. Engineered to Perform.

The new ConcealFab® Pole-Mounted Side Cabinet Line brings ConcealFab®'s renowned manufacturing quality to the side cabinet space. Expect rugged outdoor protection, optimized thermal performance, and faster ground-level deployment for modern network demands.

→ Passive-First Thermal Design

Each equipment configuration is thermally analyzed. Designs prioritize passive cooling, while you can add active cooling (fan kit) when needed.

GR-487 Design & Testing

Built to GR-487 environmental and mechanical criteria, with thermal analysis and chamber testing verified in-house for dependable outdoor performance.

Ground-Level Equipment Mounting

Radios and components can be mounted at ground level before the cabinet is installed on the pole, streamlining deployment and reducing installation time.

RF Transparent Door Options

Optional RF-transparent doors allow antennas to be deployed internally when needed, simplifying concealment and enhancing aesthetic integration.

Tested for Thermal, RF, and Outdoor Reliability

- Thermal Performance Tested In-House
- RF Transparency Chamber-Validated
- GR-487 Durability for Outdoor Reliability

Product Configurations

SKU	Name	Dimensions (in)	Description
901126_242016	Side Mount Enclosure	24	Smallest format enclosure offering efficient protection for limited, space-constrained installations.
901360_482422	Side Mount Enclosure	48	Compact enclosure ideal for tight pole spaces and smaller radio configurations.
901361_362422	Side Mount Enclosure	36	Balanced size for flexible deployments across a variety of applications.
902168_553620	Side Mount Enclosure	55	A proven format designed to meet utility-grade requirements.
901362_612824	Side Mount Enclosure	61	Expanded volume for high-capacity setups.
901363_692824	Side Mount Enclosure	69	Maximum internal space for complex equipment configurations.

Works With

SKU	Name	Description
9#####_HHWWDD_a	Side Mount Move-in Kit	Provides an easy way mount your equipment inside of our side mount enclosure products.
902108	Side Enclosure Template	A guide used during installation to ensure holes, fasteners, and equipment are accurately positioned.
902161_OFST_6	Side Enclosure Offset Mounting Bracket	This bracket is designed to securely attach a side enclosure to a surface, providing a 6
902147_FA	Fan Kit	This fan kit provides enhanced cooling for improved equipment performance and longevity.
902147_CA	Cable Protection Kit	Safeguards cables from abrasion, bug intrusion, moisture, and environmental damage.
