

Seven Positions. One Trapezoid.

The PIM Shield® 7-Position Trapezoid Snap-In Adapter adds cable positions to the PIM Shield® cable support brackets. Molded from the same polymer as the standard trapezoid, each one carries seven positions and mounts straight to the brackets, which are sold separately. The kit ships as a five-pack.

Seven Cable Positions

Each trapezoid carries seven cable positions, stepping up the count a single bracket can hold for denser runs. More positions per part means fewer brackets to mount and fewer separate pieces to track on a crowded tower face.

Mounts to PIM Shield® Brackets

The trapezoid mounts directly to the PIM Shield® cable support brackets, sold separately, so it drops straight into the existing system. No new mounting scheme is needed; it builds on the brackets a site already runs.

Same Polymer as the Standard Trapezoid

It is molded from the same polymer as the standard trapezoid, so it handles, installs, and holds up the same way in the field. Crews work with a familiar part instead of qualifying a new material or fit on site.

Ships as a Five-Pack

Each SKU is a five-pack of parts, and a full case holds ten of those packs. That sizing keeps volume orders and per-tower counts straightforward from the warehouse through to handoff on the tower.

Adds Positions to PIM Shield® Brackets

- Seven cable positions
- Mounts to PIM Shield® cable support brackets
- Molded polymer, five-pack

Product Configurations

SKU	Description	Positions	Qty.	Weight
902282-5	PIM Shield® 7-Position Trapezoid Snap-In Adapter	7	5	1.2 lbs.

Specifications

Name	Description
System PIM Performance	IM3 < -100 dBm
Test Conditions	IEC 62037-8, near field, 2× 20W test tones, dynamic stimulus
Material	UV stable, glass filled Nylon
Plastic Base Color	Black
Operating Temperature	-40°C to +70°C
